RICHMOND, VA., THURSDAY MORNING, AUGUST 20, 1874.

Richmond Dispatch.

THE CIRCULATION OF THE DIS-PATCH IS LARGER THAN THE COMBINED CIRCULATION OF ALL THE OTHER DAILY NEWSPAPERS OF THE CITY.

THURSDAY ..... AUGUST 20, 1874

THE WEATHER To-DAY .- From our reports this morning the probabilities are that the weather to-day will be partly cloudy.

SERIOUS ACCIDENT-A YOUNG MAN SHOOTS He was lying on a bed in the front room, and was in the act of transferring a Smith & when the charge exploded. The ball entered his breast between the fifth and sixth ribs, touched the apex of the heart, passed his back about two inches from the spine, and almost in a direct line from the point of

entrance. when Doctors Knex and Trent arrived, a few minutes afterwards, he was in a very precarious condition, and was vomiting blood freely. They had but little hopes of his living, as he was pulseless, and in response to questions from Mr. Bruce advised him to make any earthly preparations be might desire. Rev. Dr. Burrows was sent for and administered such religious consola-

Subsequently, the doctors injected morphine into his arm, and he somewhat rallied and the severe vomiting ceased. Later in the afternoon Dr. Maguire-was called in, and a close examination of the wound was made. The ball was found in an easy position to be extracted, but they determined to make no

effort in that direction until to-day.

Mr. Bruce was raised in Lynchburg; is about thirty years of age; and has a wife and three children. He has been a resident of Richmond about six years, and for some time has been employed as superintendent of Garber & Co.'s stables. There is no truth Also, a large stock of BLACK MOHAIRS and in the report that he purposely shot himself. His statement of how the thing occurred, made at different times to dozens of persons, was in every instance the same, and this with the great and very natural alarm he relt at first seem to demonstrate that it

was purely the result of an accident. The pistol-ball is a very small one, but the wound is in a part of the body which renders it unusually dangerous, and though his condition at 11 o'clock last night was far more favorable than it was for the two or three nours immediately following the shooting, his situation is exceedingly critical, and in the event of fever and pneumonia ensuing his death is very likely to take place.
